

Please carefully review the following list of contents. The final exams will not necessarily cover everything in the list, but the topics beyond this list will not be covered. Inside the parentheses, the forms of questions that will appear in the final exam and the points related to the specific chapters are also provided. There may be more than one correct choices for each multiple-choice question (选择题). Please select all choices that apply. You will only get the score, if you select exactly the correct choices.

1. Introduction (6分选择题+6分大题)  
Internet; physical media; protocol layers; service models; network edge; network core; delay, loss, and throughput
2. Application Layer (8分选择题+8分大题)  
application architectures; sockets; HTTP; cookies; web caches; FTP; email protocols; DNS
3. Transport Layer (10分选择题+10分大题)  
multiplexing and demultiplexing; rdt (state machine excluded); UDP; TCP
4. Network Layer (14分选择题+12分大题)  
control plane and data plane concepts; router architecture; IP; routing protocols; intra-AS routing; inter-AS routing; ICMP
5. Link Layer (8分选择题+12分大题)  
error detection and correction; MAC address; ARP; multiple access protocols; LANs
6. Wireless Networks (6分选择题)  
WiFi; Bluetooth; 4G LTE
