

# Lab02-Algorithm Analysis

Exercises for Algorithms by Xiaofeng Gao, 2016 Spring Semester

Name:----- Student ID:----- Email: -----

1. Consider the sorting algorithm shown in Alg. 1, which is called BUBBLESORT.

- (a) What is the minimum number of element comparisons? When is this minimum achieved?
- (b) What is the maximum number of element comparisons? When is this maximum achieved?
- (c) Express the running time of Alg. 1 in terms of the  $O$  and  $\Omega$  notations.
- (d) Can the running time of the algorithm be expressed in terms of the  $\Theta$  notation? Explain.

---

### Algorithm 1: BUBBLESORT

---

```

input : An array  $A[1 \dots n]$  of  $n$  elements.
output:  $A[1 \dots n]$  in nondecreasing order.

1  $i \leftarrow 1$ ;  $sorted \leftarrow false$ ;
2 while  $i \leq n - 1$  and not  $sorted$  do
3    $sorted \leftarrow true$ ;
4   for  $j \leftarrow n$  downto  $i + 1$  do
5     if  $A[j] < A[j - 1]$  then
6       interchange  $A[j]$  and  $A[j - 1]$ ;
7        $sorted \leftarrow false$ ;
8    $i \leftarrow i + 1$ ;

```

---

2. For Alg. 2 and Alg. 3 shown below, answer the following questions respectively.

- (a) Give the maximum number of times Line 6 is executed in Alg. 2 when  $n$  is a power of 3.
- (b) Give the maximum number of times Line 5 is executed in Alg. 3 when  $n$  is a power of 2.
- (c) What is the time complexity of both algorithms expressed in the  $O$  and  $\Theta$  notation?

---

### Algorithm 2: COUNT1

---

```

1  $count \leftarrow 0$ ;
2 for  $i \leftarrow 1$  to  $n$  do
3    $j \leftarrow \lfloor n/3 \rfloor$ ;
4   while  $j \geq 1$  do
5     for  $k \leftarrow 1$  to  $i$  do
6        $count \leftarrow count + 1$ ;
7       if  $j$  is even then  $j \leftarrow 0$ ;
8       else  $j \leftarrow \lfloor j/3 \rfloor$ ;

```

---

---

### Algorithm 3: COUNT2

---

```

1  $count \leftarrow 0$ ;
2 for  $i \leftarrow 1$  to  $n$  do
3    $j \leftarrow \lfloor n/2 \rfloor$ ;
4   while  $j \geq 1$  do
5      $count \leftarrow count + 1$ ;
6     if  $j$  is odd then  $j \leftarrow 0$ ;
7     else  $j \leftarrow j/2$ ;

```

---

3. Fill in the blanks with either true or false:

| $f(n)$         | $g(n)$              | $f = O(g)$ | $f = \Omega(g)$ | $f = \Theta(g)$ |
|----------------|---------------------|------------|-----------------|-----------------|
| $2n^3 + 3n$    | $100n^2 + 2n + 100$ |            |                 |                 |
| $50n + \log n$ | $10n + \log \log n$ |            |                 |                 |
| $50n \log n$   | $10n \log \log n$   |            |                 |                 |
| $\log n$       | $\log^2 n$          |            |                 |                 |
| $n!$           | $5^n$               |            |                 |                 |

4. Use the  $\prec$  relation to order the following functions by growth rate:

$$n^{1/100}, \sqrt{n}, \log n^{100}, n \log n, 5, \log \log n, \log^2 n, (\sqrt{n})^n, (1/2)^n, 2^{n^2}, n!$$
